

GE-302 Brass Flow Rate Sensor

The flow sensor is produced by Brass material, stability and sensitive, widely used in HVAC system, water heating system, water treatment system, to calculate the flow rate.

1. Brass Material, High Stability
2. Pipe Size: G1/2", G3/4"
3. Flow Range: 1L/min ~ 30L/min ~ 60L/min
4. Voltage: DC3V ~ DC18V DC5V is standard
5. Max Current: 15mA
6. Pulse duty factor: 50 ±3%
7. High Level of Pulse Output: >4.5V (DC5V)
8. Low Level of Pulse Output: <0.5V (DC5V)
9. Max Pressure: 20bar
10. Hall Component, made in Japan
